

Quality Policy

Triton Environmental Consultants Ltd. (Triton) is one of Canada's largest environmental consulting firms with offices located across Western Canada.

Our partners and clients trust us to provide a wide range of professional services, and we take great satisfaction in our ability to provide them with responsible, practical, and timely environmental solutions.

Our quality management system applies to the planning, provision, and delivery of environmental consulting services.

To clarify what quality means to Triton and our clients, the goals we have set ourselves help us maximize the impact of quality management and respond to current and future challenges:

- Goal 1: Strengthen our professional expertise by continually improving, learning, and innovating.
- Goal 2: Satisfy client, project delivery, and relevant statutory and regulatory requirements.
- Goal 3: Continually improve the quality management system.

In undertaking to achieve these goals, we will:

- Promote quality as a core value;
- Facilitate quality improvement by encouraging the contribution of ideas and opportunities;
- Encourage quality systems thinking across organizational functions to establish quality from end to end; and
- Create and share organizational knowledge throughout Triton.
